This AirNow page (by US EPA) displays individual air monitoring sites and the hourly average particulate matter (PM) reading for each monitor.

https://www.airnow.gov/index.cfm?action=airnow.local_state&stateid=5

This AirNow page provides a composite California map of air quality hazard for PM and ozone (O₃) combined. It is also updated hourly. CDPH recommended this map for the UCG report. It also provides descriptions of the health risk levels, corresponding to the table below, as buttons below the map.

<http://californiasmokeinfo.blogspot.com/>

This page provides AQ forecasts based on the US Forest Service AirFire model, *not* current air monitoring readings. It also provides site-by-site rolling 24-hour AQ histories that are informative.

This CalEPA page provides several links (under the headings AIR QUALITY and FIRE CLEANUP: ASH AND DEBRIS) to recently-updated public health and safety FAQs, fact sheets and guidance documents (as well as to the links above.)
